

I did not know that I wasn't breathing  
I thought it was my age or hormones making me feel  
so tired, weak, non motivated, Everything was difficult  
I thought this must be normal for my age (56)  
using Nasonex:  
Now I feel better than I have in years!

I feel happy now! 😊

Since using Nasonex I sleep better. The quality is  
better because I was snoring all the time.  
Now I feel a lot of air coming thru my nose.  
When I breathe it feels satisfying

I was fatigued all the time. I had tons  
of lab tests by 2 different doctors because  
I thought I must be sick, thyroid, hormones,  
vitamin deficiency. All of my test came out normal  
~~too~~ I have been having trouble concentrating  
for years - now it is so much better. I felt  
like I was in a fog all the time.  
Now I have a lot of energy like I used to  
years ago + I want to get out + do things  
I can smell now.

Debra
